The authors regret that:

1) at the beginning of page 274 the correct first line and Eq. (34) are: obtaining, thanks to the use of Eq. (31) and to the definition \( \Delta \Sigma_2 = \Sigma^R_2(p) - \Sigma^L_2(p) \),

\[
Z_m = Z_\psi \left( 1 + \frac{g_0^2}{16\pi^2} C_F \Delta \Sigma_2 \right).
\] (34)

2) at page 278 the correct first equation (48) is

\[
Z_m = 1 - \frac{g_0^2}{16\pi^2} C_F (\Delta \Sigma_1 - \Delta \Sigma_2).
\]

The authors would like to apologise for any inconvenience caused.
